

## The New Hampshire Primary Care Sourcebook is Organized by Three Guiding Principles

**Purpose Statement:** The New Hampshire Primary Care Sourcebook was developed as a resource for current information about Community Health Centers, Federally Qualified Health Centers, and other primary care providers. The information, maps, and data demonstrate how Bi-State members increase access, manage costs, and improve the quality of primary care in New Hampshire. All information in this sourcebook is current as of the date of publication and will be updated semi-annually.
